LUNA

HEALTH REPORT

How to interpret Luna's genetic health results:
If Luna inherited any of the variants that we tested, they will be listed at the top of the Health Report section, along with a description of how to interpret this result. We also include all of the variants that we tested Luna for that we did not detect the risk variant for.

A genetic test is not a diagnosis
This genetic test does not diagnose a disease. Please talk to your vet about your dog's genetic results, or if you think that your pet may have a health condition or disease.

Good news!

Luna is not at increased risk for the genetic health conditions that Embark tests.

Breed-Relevant Genetic Conditions	**7 variants not detected**
